About ACS wicks:
ACS series wicks are a flat braided candle wick made from textile-grade cotton and are developed to work best in natural waxes, especially soy wax. These wicks tend to burn cleanly and can be less prone to mushrooming (subject to testing and fine tuning). ACS wicks are all natural and are Zinc and Lead free.

How to measure up:
Measure the inside diameter of your jar at its widest point then refer to this chart to select a suitable wick. There are often two or more wicks that match your size, this is to allow for "fine tuning" due to the many variables in candle recipes. We recommend starting out at the higher end of the scale and testing from there.
