

# A quick guide to using S16 Wax

S16 wax has been a firm favourite of Candle Creations for years and this is why:

- 
- ✓ Made entirely from natural products
  - ✓ Smooth set after burning
  - ✓ A high fragrance tolerance for a soy wax
  - ✓ Great container adhesion
  - ✓ Anti-shrinking and frosting properties
- 

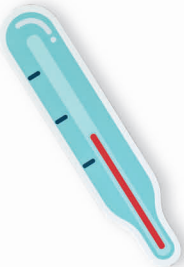

# A reminder of those *temperatures*

All Seasons Wax is a different formulation to other soy waxes such as GW-464 and therefore you will need to make some changes to how you make your candles. The main difference is the pour temperature. All Seasons Wax recommends you pour at a lower temperature which is between 42 and 49°C

## **A quick guide to the recommended temperatures**

Suggested Temperature for Fragrance: 62-65°C

Suggested Pouring Range: 42-49°C

Recommended Room Temperature: 22°C
